

SEOS BIOMETRIC CONVERGED SMART CARD (POWERED BY TRUSTSEC & SAMSUNG)

The SAMSUNG onechip Bio smart card, powered by TrustSEC JAVA CARD OS and featuring the HID Global SEOS applet, represents the ultimate evolution in converged identity. This card is engineered for maximum assurance and user convenience, combining physical and logical access control with integrated biometrics. The card's unique "all-in-one" chip integrates the fingerprint sensor, Secure Element (SE), and Secure Processor, allowing biometric matching to occur securely on the card itself. This ensures the user's data never leaves the secure environment, delivering a seamless, highly secure, and standards-compliant authentication experience for the most demanding enterprise and government applications.
